ZuraMedOps

A Healthcare Management Platform

# ZuraMedOps summary matrix

| System | Main job | Primary users | Typical data |
|---|---|---|---|
| **EHR/EMR** | Document and manage patient care, including clinical histories, diagnoses, orders, prescriptions, and results. | Physicians, nurses, and other authorized clinical care team members. | Patient demographics, medical histories, clinical notes, diagnoses, medications, allergies, orders, and test results, health analytics. |
| **Practice Management Software** | Manage daily practice operations, including scheduling, registration, insurance verification, billing, and administrative reporting. | Front-desk staff, schedulers, practice managers, billing staff, and administrators. | Appointment schedules, provider calendars, patient demographics, insurance details, charges, claims, and payments. |
| **Revenue Cycle Management (RCM)** | Manage revenue from patient registration through coding, claims submission, denial resolution, and final payment collection. | Medical coders, billing specialists, accounts receivable teams, revenue cycle managers, and finance leaders. | Eligibility and authorization records, diagnosis and procedure codes, charges, claims, remittances, denials, payments, and outstanding balances. |
| **Asset management** | Track, maintain, and optimize medical equipment to ensure availability, safety, and cost efficiency. | Biomedical engineers, maintenance technicians, nursing teams, asset managers, and hospital administrators. | Asset IDs, specifications, locations, availability, utilization, maintenance and calibration records, warranties, costs, and compliance documentation. |

ZuraMedOps

A Healthcare Management Platform

# List of ZuraMedOps modules

01 / MODULE

## Zura360 – Intelligent Patient 360° View

A unified patient intelligence dashboard that brings vitals, trends, diagnoses, medications, care-team documentation, authorizations, clinical records, HCC/RAF scores, and patient analytics into one secure view.

02 / MODULE

## ZuraAssets – Intelligent Asset Management

A scalable Intelligent asset management system built specifically for small clinics to multi-practice groups—tracking medical equipment, supplies, and pharmaceuticals in real time to prevent loss, reduce waste, ensure compliance, and control operational costs without enterprise complexity.

03 / MODULE

## ZuraCurodex – Structured Clinical Intelligence Engine

Intelligent medical terminology database that uses hierarchical drill-down navigation and real-time synonym mapping to ensure every diagnosis is SNOMED CT, ICD-10, and CPT-aligned from the moment it's entered.

04 / MODULE

## ZuraEngage – Secure Patient Messaging & Intelligent Broadcast Management

A HIPAA-compliant communication hub that centralizes all patient messaging, automates internal tracking with built-in alerts, and enables management-controlled health campaigns—all logged within the HMS for complete audit readiness and care continuity.

05 / MODULE

## ZuraInsight – Real-Time Compliance, Risk, and Patient Intelligence

An intelligent analytics and compliance engine that delivers real-time HCC RAF scoring, HEDIS gap tracking, and predictive patient analytics to maximize reimbursements, ensure audit readiness, and improve population health outcomes.

06 / MODULE

## ZuraPortal – The Patient's Secure Front Door to Care

A secure, easy-to-use patient portal that gives patients control of everyday care—from appointment booking and prescription refill requests to health updates, provider messages, and schedule changes—while keeping every interaction connected to the ZuraMedOps clinical workflow.

07 / MODULE

## ZuraRCM – Intelligent Revenue Cycle Management

An Intelligent revenue cycle management solution that connects scheduling, eligibility, authorization, documentation, coding, claims, payments, and denial prevention—helping practices capture earned revenue faster, reduce rework, and protect margins.

08 / MODULE

## ZuraScheduler – Intelligent Appointment Management & Operational Optimization

An Intelligent scheduling engine that auto-adjusts time slots based on visit complexity, tracks real-time provider status, manages all appointment types (scheduled, walk-in, standby, cancelled), and integrates with ZuraSOAP and Zura360 to flag pending items before each patient arrives.

09 / MODULE

## ZuraSOAP – Intelligent Clinical Documentation Engine

A highly structured, Intelligent SOAP documentation system with guided templates, comprehensive Review of Systems and Physical Exam databases, voice-to-text , auto-generated notes and visit summaries, smart macros, and built-in clinical scoring — designed to eliminate redundancies, prevent missed documentation, and maximize revenue through intelligent diagnosis grouping.

## ZuraHMS Essential

A basic package with Zura360, Zura SOAP, ZuraPortal, ZuraScheduler and basic patient reporting.

## ZuraHMS Prime

Includes all the ZuraMedOps modules and unlimited integrations (EHRs, labs, HIEs, pharmacies, billing services).

ZuraMedOps

A Healthcare Management Platform

# Why ZuraMedOps

## Built around your reality

Your business, your workflow, your decision.

**You choose which modules are right for your practice. ZuraMedOps modules will adapt to your clinic of any size.**

## Multiple Configuration Options

01 — BUILD ZuraHMS Prime with all the available ZuraMedOps modules

### Build a Full Electronic Healthcare Management System

Design and implement a complete Health Management System using all the modules from the ZuraMedOps platform as the configurable foundation.. The solution can bring together patient management, scheduling, clinical documentation, care engagement, revenue-cycle workflows, analytics, asset management, terminology support, and operational dashboards.

02 — Select ZuraHMS Essential or any combination of modules as stand alone system

### Implement Selected ZuraMedOps Platform Modules

ZuraHMS Essentials package: Zura360, ZuraScheduler, ZuraSOAP, ZuraPortal, and basic patient reporting.

As your organization grows and becomes familiar with the platform, add modules based on your needs. ZuraCuroDex can be added for clinical search and validation or purchased as a standalone solution. It can also be bundled with ZuraInsights—including HCC/RAF scoring, HEDIS tracking, and advanced patient analytics—with configuration tailored to your workflow.

ZuraAssets and ZuraEngage may be purchased together to support asset management, triage, alerts, internal care-team communication, and operational coordination.

03 — INTEGRATE ZuraMedOps modules with third-party systems.

### Integrate With Your Existing Systems

Connect ZuraMedOps modules with third-party EHR/EMR systems, practice-management software, laboratory platforms, imaging systems, pharmacy systems, billing platforms, payor portals, patient-engagement tools, HR systems, asset-management tools, and enterprise reporting platforms.

Note: Compatibility with your existing system need to be verified and reconfigured accordingly for maximum benefit to your clinic

04 — Fully customized HMS solution as your proprietary product

### Develop Custom Workflows and Features

Partner with our sister affiliate AC TechConnect US. www.actechconnect.com to build specialized functionality for your organization's care model, specialty, patient population, service line, operational process, reporting requirement, payer workflow, or regional compliance environment. This may include custom forms, portals, dashboards, approval workflows, mobile experiences, integrations, automation, and smart administrative tools.

## If your main goal is to modernize without Disruption, then we suggest:

Improve a single high-impact workflow—such as patient intake, scheduling, documentation, referrals, prior authorization, billing follow-up, asset management, or patient communication—without forcing a costly, immediate replacement of the client's core EHR or practice-management system.

ZuraMedOps

A Healthcare Management Platform

# Value we bring with ZuraHMS Prime

01 / CONNECT

### Total Ecosystem Interoperability

02 / SCALE

### Enterprise Scalability Without Limits

03 / ADAPT

### Complete Flexibility with Custom-Built Workflows, Not One-Size-Fits-All

04 / INSIGHT

### Advanced Risk & Population Health Intelligence

05 / CAPTURE

### Maximum Revenue Capture

06 / ACCELERATE

### Faster Patient Encounters

07 / ADOPT

### Minimal training, rapid adoption

08 / OPERATE

### Operational success from day one

09 / PROTECT

### Dedicated Compliance & Security Architecture

10 / SUPPORT

### Priority 24/7 Support with Guaranteed SLAs

11 / IMPLEMENT

### White-Glove Implementation & Change Management

12 / UNLIMITED

### Unlimited Licensing—No Hidden Costs

13 / PARTNER

### Strategic Roadmap Partnership

14 / EVOLVE

### Future-Proof Architecture

## ZuraHMS Prime: Where Complete Interoperability Meets Enterprise Intelligence.

Every module. Every integration. Every capability. One unified platform—built to your exact specifications, backed by unlimited support, and engineered for infinite scale.

## Success Criteria

| | | | | |
|---|---|---|---|---|
| 98% | 40% | 3.5 M | 99.9% | 30% |
| FIRST-PASS CODING ACCURACY | Less time per chart | Codes Processed | Platform Uptime | Increase Operational Efficiency |

# Corporate Structure

## Shared Leadership, Distinct Missions: For Best-in-Class Products and Services

### Clear Accountability

**Aryabh Corp** owns the product roadmap, quality assurance, security compliance, and feature releases. **AC TechConnect** owns implementation success, onboarding, and tailored integrations.

### Scalable Partnerships

**Aryabh Corp** assists with product licensing and **AC TechConnect** takes care of the rest: product implementation, training, third-party engagements, post-launch support. No vendor lock-in, no forced services bundling.

### Shared leadership, distinct missions

Both companies share the same executive management and strategic vision, but operate with distinct mandates — so product innovation never competes with services delivery.
